

Laurent C31

misceláneo

The undisputed leader for speed and versatility, the C31fs allows the orientation of lids, stoppers, or caps and adapts to many applications. This C31FS orienting dispenser is equipped with selection plates mounted on a rotating drum. It can direct, sort, and dispense products of all sizes. In modular version: the hopper is placed below the orientation system, which is raised. This gives it a small footprint. The product outlet is at a height of approximately 2.5 meters.
